eFundi Tutorial: Overview

Each module/course site on eFundi will have an Overview tool in the menu on the left. This is the first page that students will see when accessing your site.

You can add custom messages to your Overview section to welcome your students or to keep them informed of events, their progress, etc.

Tip: This is your first contact point with your students. Consider embedding a video of yourself where you tell them a little more about yourself and what they will be learning in your module. This will make it easier for them to get to know you and understand how the module fits into their course programme.
