

## eFundi Tutorial: Test & Quizzes

### How do I set up a random question set

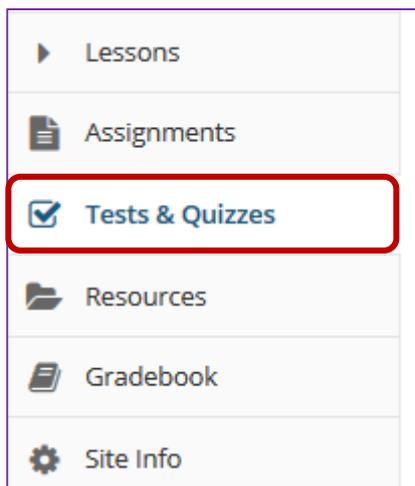

A random question set is set up to randomly choose questions from a [question pool](#) to prevent all students getting the same questions for the same assessment while maintaining the total mark allocation.

To set up a random question set, question pools will first need to be created. For the steps in how to set up a question pool click [here](#).

### Step 1: Go to Tests & Quizzes

Select the **Tests & Quizzes** tool from the Tool Menu of your course site.

If this tool is not visible on the left, it still needs to be added by the site Instructor.

For steps in adding a tool to your eFundi site access the tutorial on *How to add/remove tools on a site* from the [Support tutorial site](#)

### Step 2: Select an assessment

Questions may be added to any assessment. Select an existing assessment or create a new one.

## Create a New Assessment

Assessments Question Pools Event Log User Activity Report

### Create an Assessment

Create from Scratch

Assessment Title

Create using assessment builder  
 Create using markup text

OR

Import from File (XML or ZIP)

Working Copies: not released to students | Published Copies: released to students

Action	Title	Last Modified	Modified Date
-- Select Action --	1 new		NADINE SMIT

For more information on creating new assessments, see [How do I create an assessment?](#)

Or edit an existing assessment

Working Copies: not released to students | Published Copies: released to students

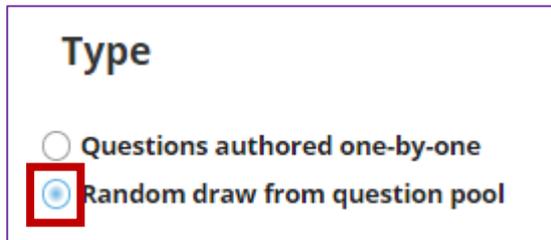

Action	Title
<ul style="list-style-type: none"><li>-- Select Action --</li><li>-- Select Action --</li><li><b>Edit</b></li><li>Preview</li><li>Print</li><li>Settings</li><li>Duplicate</li><li>Export</li><li>Remove</li></ul>	1 new

## Step 3: Edit a part

Part  Short Answer/ Essay questions - 0 questions [Copy to Pool](#) [Remove](#)

In Tests & Quizzes, open the assessment and find the part. To edit the name and any of the information and settings associated with a part, next to that part's name, click **Edit**.

For the Type, choose Random draw from question pool

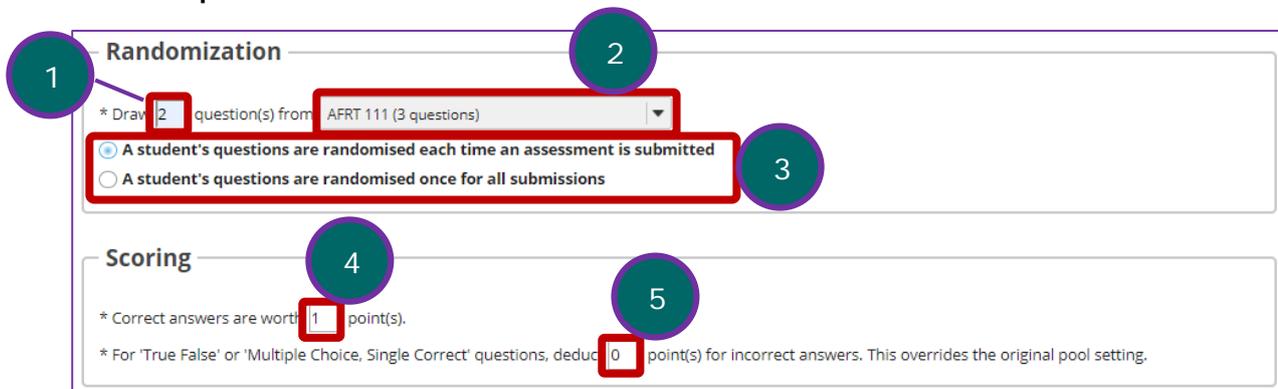

**Type**

Questions authored one-by-one

Random draw from question pool

Set the options for the random set

**Randomization**

\* Draw  question(s) from

A student's questions are randomised each time an assessment is submitted

A student's questions are randomised once for all submissions

**Scoring**

\* Correct answers are worth  point(s).

\* For 'True False' or 'Multiple Choice, Single Correct' questions, deduct  point(s) for incorrect answers. This overrides the original pool setting.

1. Enter the number of questions to draw from the selected question pool.
2. Select the question pool from the drop-down menu.
3. Choose to either randomize student questions each time an assessment is submitted or randomize student questions once for all submissions.
4. Enter the point value for correct answers on each question. Note that all questions in this random draw must be worth the same amount of points.
5. (Optional) For True/False and Multiple Choice, Single Correct questions, you may also enter a negative point value if a question is answered incorrectly.

**Note:** Point values entered here override any value that was specified for individual questions in the corresponding Question Pool.

Click Save

## Step 4: View assessment

Part  Random draw from AFRT 111 - 2 questions [Update Questions](#) [Remove](#) | [Edit](#)

The questions for this part were generated from the question pool, **AFRT 111**, on **Tuesday, 21 April 2020 at 23:32:08 o'clock SAST**. To get latest changes made to the pool, click **Update Questions** or click **Edit** for this Part and then click **Save**. Clicking **Preview** or **Publish** will automatically update the pool-drawn questions as will exporting an assessment.

You will be returned to the assessment editing screen with the random draw question set shown. You may add additional questions or question sets by adding more parts to the assessment.
