## Student access to their Turnitin Report

Turnitin does not check for plagiarism in a piece of work. Instead, it will check a student's work against their database, and if there are instances where a student's writing is similar to, or matches against, one of their sources, they will flag this for review.

Follow the steps below to get access to your report.

**Note:** Your lecturer could opt not to have given you access.

### 1 In eFundi go to your site and access the Assignments tool

### 2 From the Assignment List, locate the assignment title and click on it

Assignment List

Select an assignment to view details, start working or edit your previous work.
