

NCHE111 TUTORIAL SESSIONS

Dear student

As of tomorrow Thursday 6 April, you will not have practical sessions until the end of next week. The practical sessions will be replaced by tutorial sessions. I will use these tutorial sessions to do some class activities in preparation for the semester test which will be written on Wednesday 19 April (more info will follow later). The class activities will mostly be from Study Unit 4. The practical sessions will resume as normal after the class-free assessment weeks.

For the tutorial session, you stay in the group you are in for your practical session and not for your theory classes. In other words, if you do your NCHE111 practical experiments on a Tuesday afternoon, you stay in that group for the tutorial session. Please bring paper, pen, calculator, periodic table and solubility table with you to the tutorial sessions.

Also, there will be no NCHE111 theory classes tomorrow (Thursday 6 April) for group 3 (Building G8_G01 from 13:00 – 14:15) and group 4 (Building N2B_G01 from 09:30 – 10:45).

THE VENUES, DATES AND TIMES FOR THE TUTORIAL SESSIONS ARE SCHEDULED AS FOLLOWS:

Thursday afternoon **6 April** in building N2A_G01 from 14:30 to 16:30 at the latest.

Friday 7 April and Monday 10 April: NO CLASS / TUTORIALS

Tuesday afternoon **11 April** in building N2B_G01 from 14:30 to 16:30 at the latest.

Wednesday afternoon **12 April** in building E3_G20 from 14:30 to 16:30 at the latest.

On Thursday **13 April**, a Monday roster will be followed. So, the practical group that normally has their NCHE111 practical on a Monday afternoon will have their tutorial session on Thursday afternoon in building E6_B15 from 14:30 to 16:30 at the latest.

Friday afternoon **14 April** in building E8_G01 from 14:30 to 16:30 at the latest.

Thank you.

Regards

Dr Colin
